Technical Partner DELL Technologies

Team Name: Kishta Coders

Team Leader Name: Ojaswee Upadhyay

Problem Statement: PROBLEM ID: CSIHACK02

IT Solutions for PMDDKY Scheme Implementation (Uttarakhand)

Problem Statement:

5.8 LAKH

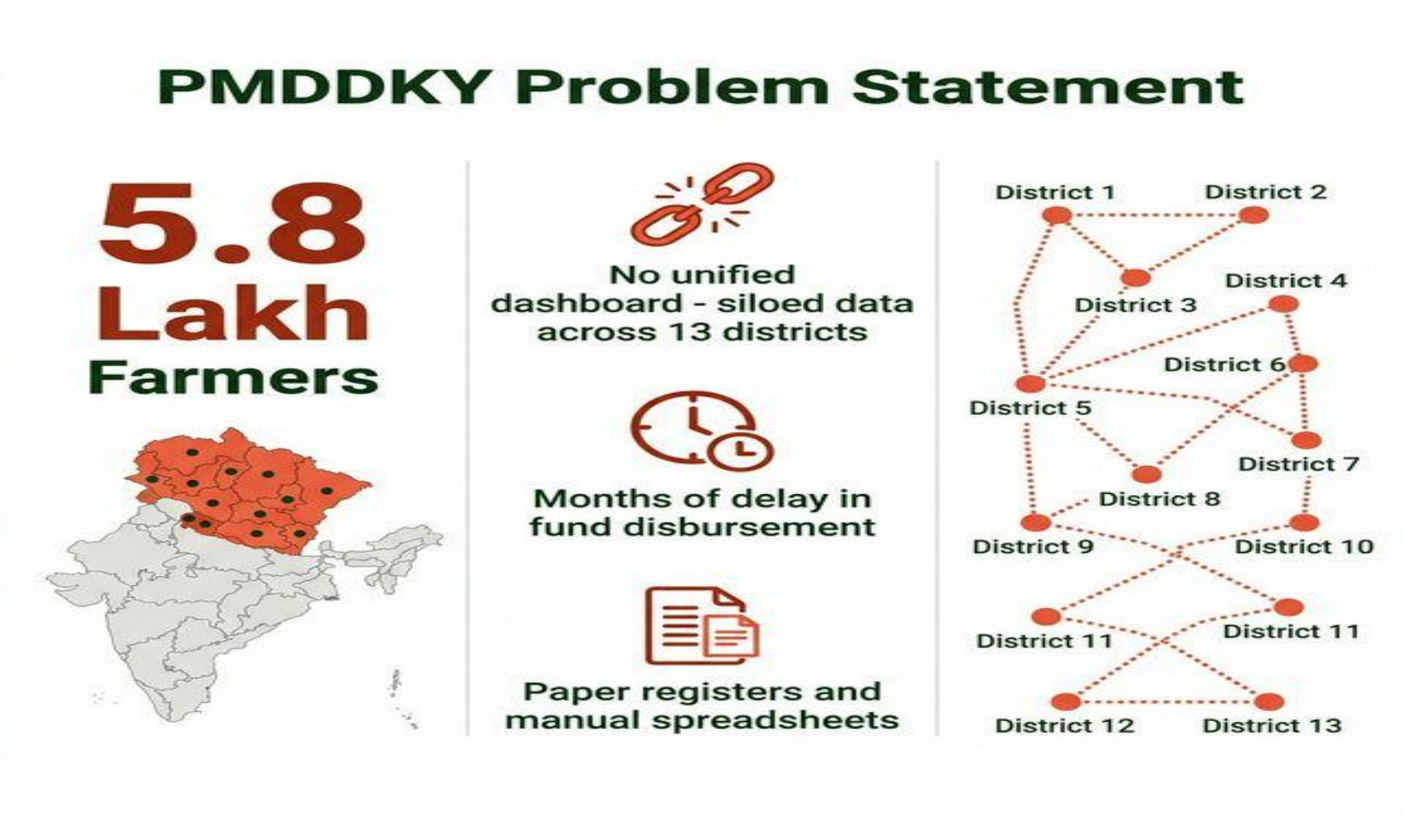
Farmers eligible in
Uttarakhand under PMDDKY

13 Backward Districts

Zero unified visibility

MONTHS of delay

in fund disbursement



District officials rely on paper registers & siloed Excel files — no central platform, no real-time visibility, no anomaly detection

BUILD4भारत

DELL Technologies

MeitY Startup Hub | UNDP | Anritsu | runway

Real-Time Dashboard

Live KPI cards — beneficiaries, funds, district progress, % verified

GIS District Map

Choropleth map of Uttarakhand's 13 districts — click to drill down

AI Analytics

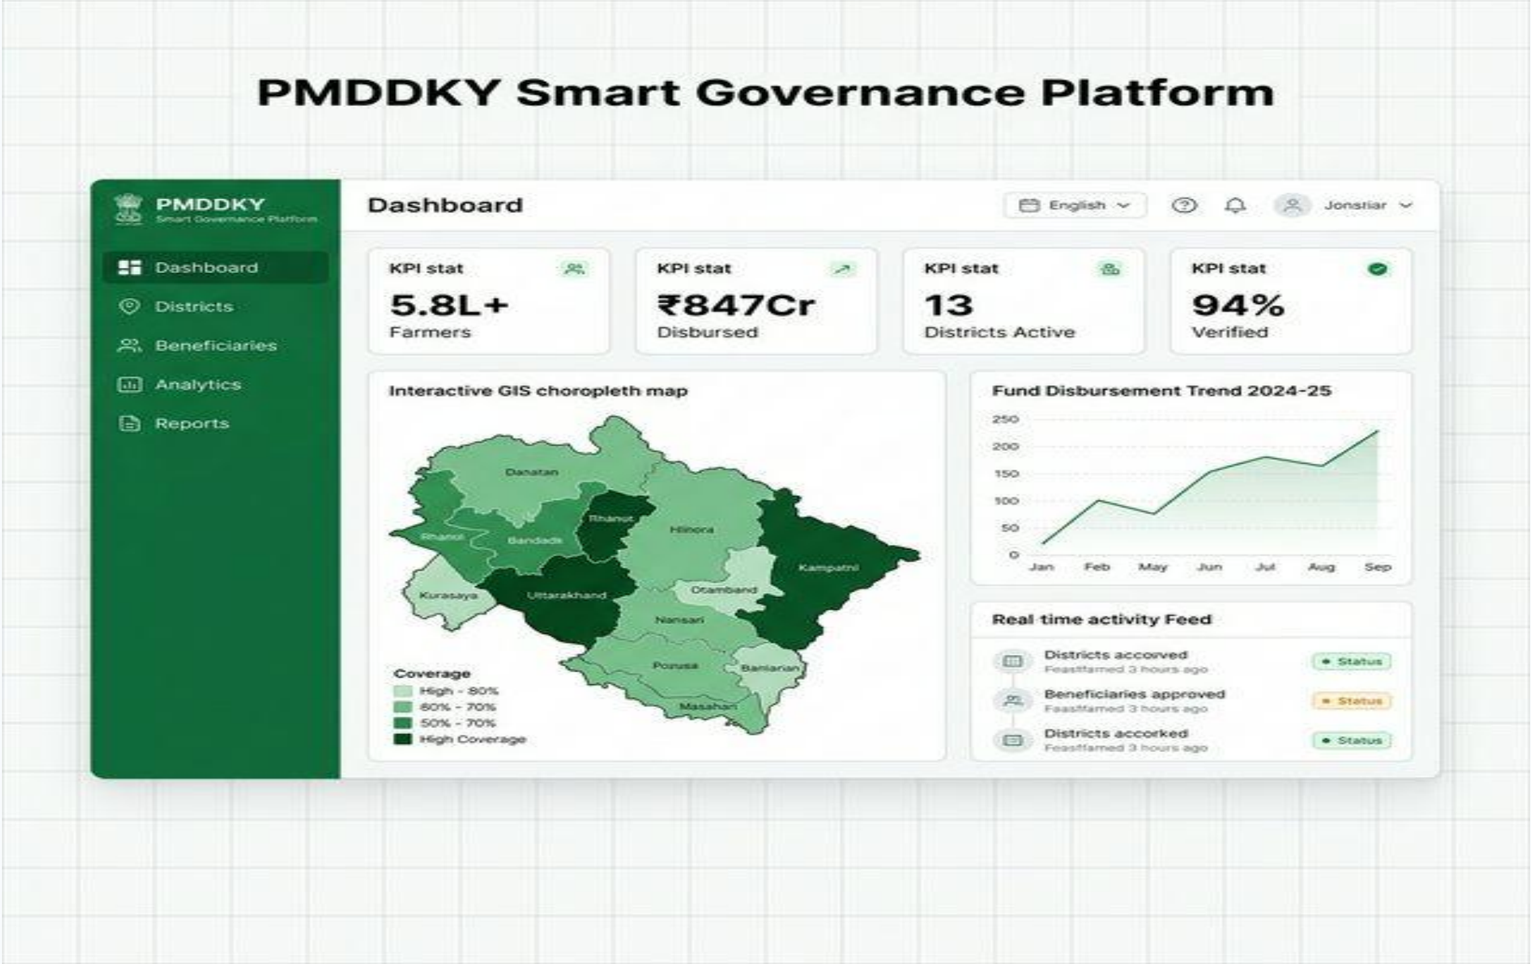
Anomaly detection, trend forecasting, district performance ranking

Beneficiary Management

Aadhaar-verified records, status badges

Socket.IO Real-Time

Live push — no page reload needed

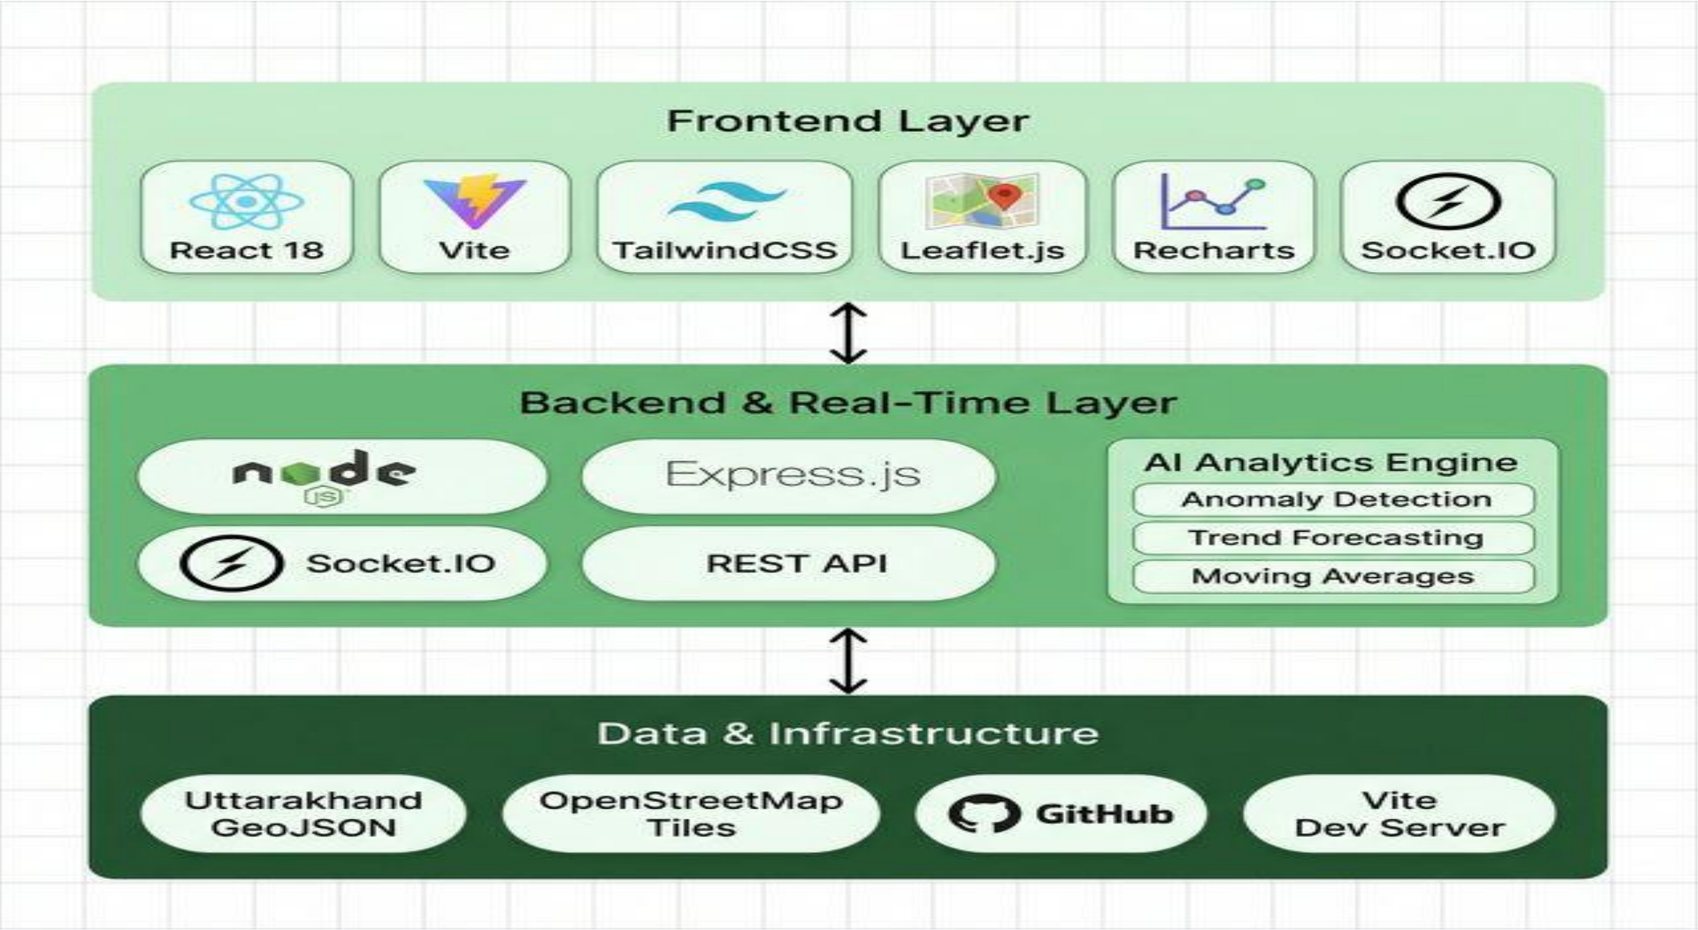


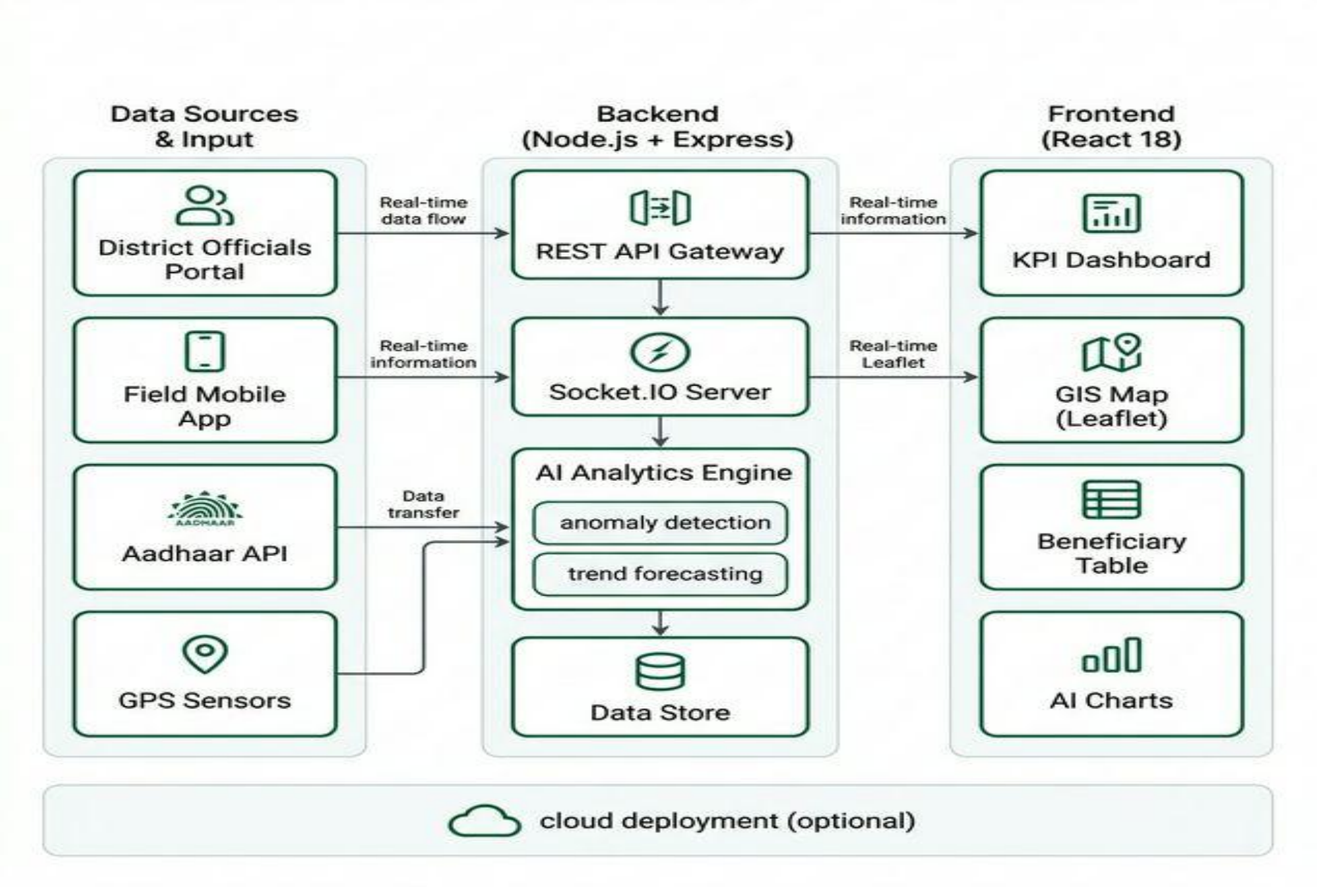
100% Open Source
Zero licensing cost

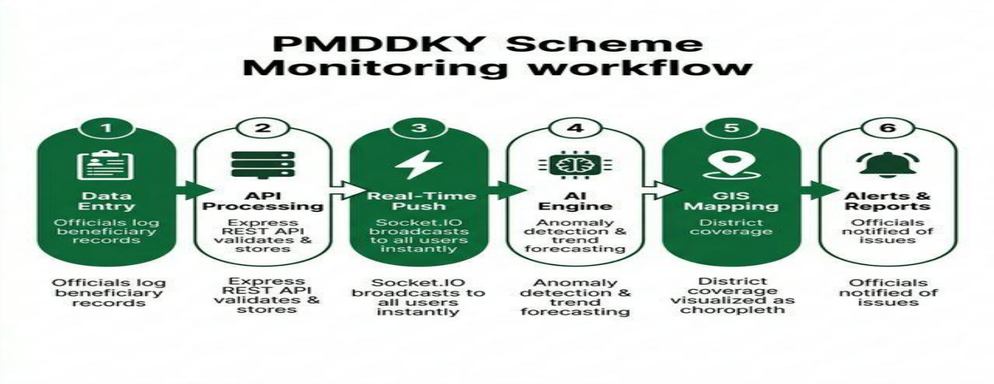
Deployable on
₹500/mo VPS
or govt NIC servers

Real-time via
Socket.IO

Handles concurrent
district-level users







3-tier architecture: Field Input → Node.js + Socket.IO Backend → React Frontend | AI Engine: Anomaly Detection + Forecasting

IMPACT — TECH FOR COMMUNITY

5.8L+
Faster fund access — months → days

60%+ reduction
Admin overhead eliminated

13 Districts
Unified real-time visibility

~70%
Fund delay reduction

First GIS map of PMDDKY in Uttarakhand

AI anomaly detection = Zero fraud leakage

🧑‍🌾 5.8L+ Farmers

Faster verified fund access — months → days

🏛️ 13 District Admins

Single dashboard replaces manual reports

📈 State Policymakers

Compare all districts, reallocate proactively

🌱 Agriculture

Better seeds & irrigation from timely fund flow

Professional Feasibility Comparison

Traditional Approach		PMDDKY Smart Platform
✗ Paper registers		✓ Real-time GIS dashboard
✗ Excel siloed data		✓ Unified data across 13 districts
✗ Monthly manual reports	VS	✓ Instant Socket.IO updates
✗ No real-time visibility		✓ AI fraud/anomaly detection
✗ High administrative cost		✓ Zero licensing cost (100% open source)
✗ Months to detect fraud		✓ Works on ₹500/month VPS

Months → Days (fund delay) | **Manual → Automated** (reporting) | **Siloed → Unified** (data access)

First GIS-Mapped PMDDKY Dashboard

Choropleth map of Uttarakhand — district-level beneficiary density live

AI Anomaly Detection

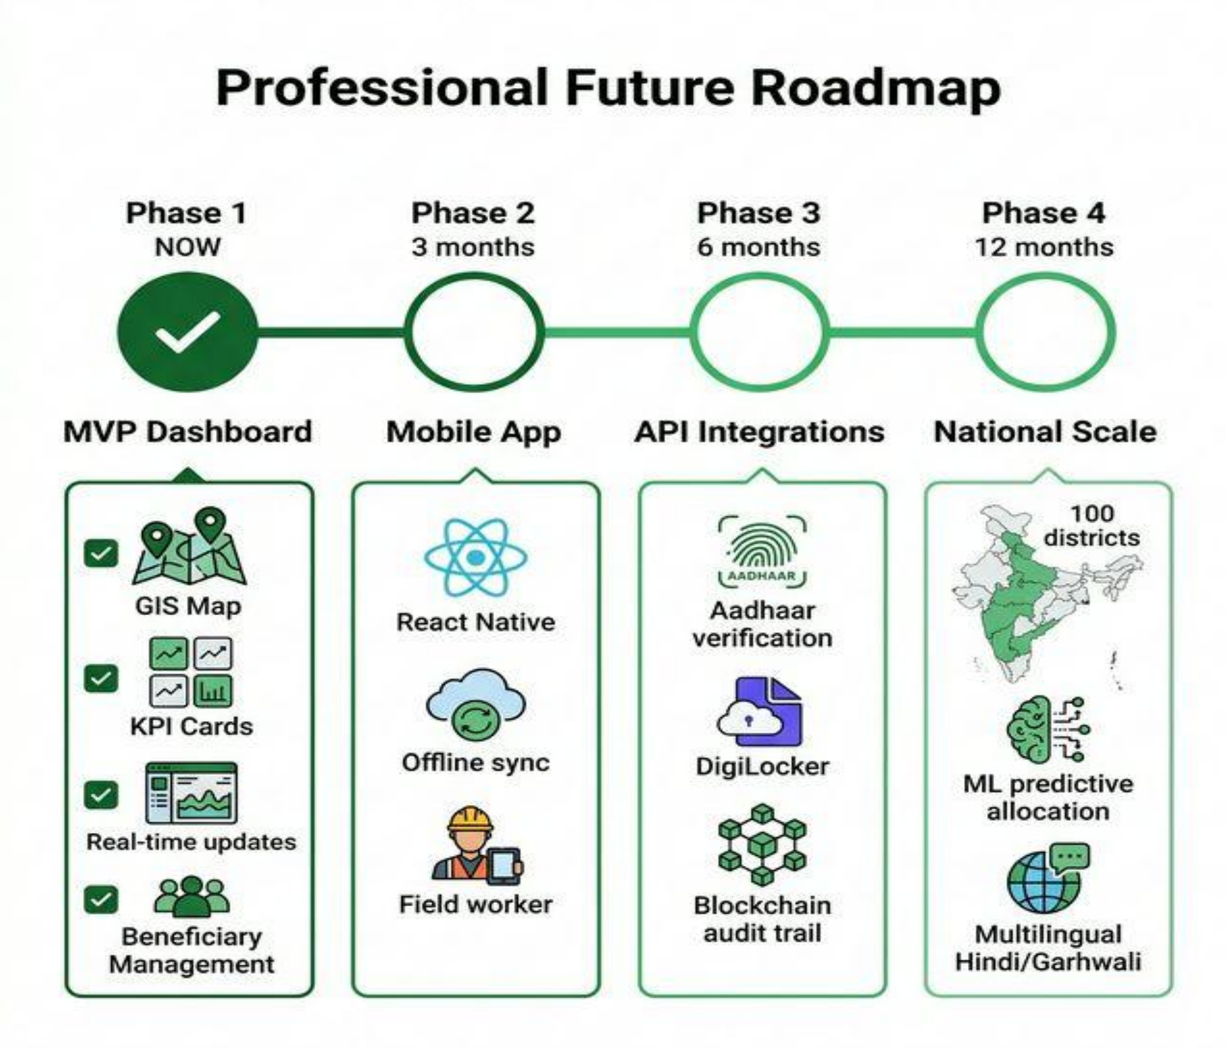
Flags unusual fund spikes or enrollment drops before they become crises

Zero-Reload Real-Time

Socket.IO — field officers and HQ see the same data change simultaneously

₹500/month Deployment

100% open-source, runs on cheap VPS or government NIC servers



Mobile App

React Native offline-first for field officers

Aadhaar API

Real integration for instant beneficiary verification

Blockchain

Immutable audit trail for RTI compliance

100 Districts

National rollout to all PMDDKY districts

Thank You
